

Fifth biennial report of the Kansas State Board of Agriculture

Section 29, Pages 841 - 847

This biennial report covers the years 1885-86. The volume contains two parts and the page numbering starts over at the beginning of part II. The volume contains numerous agricultural statistics and information about other industries. It also contains information about Kansas weather, schools, churches, various agricultural issues such as Texas fever, chinch bugs, vacant public lands, etc. A major part of the volume is devoted to information gathered during the 1885 statewide census conducted by the Board of Agriculture. Part I contains a number of tables with statistics about Kansas residents broken down by county. Part I also contains a section on each county, providing summary information about the history of the county, nativity of residents, a description of the landscape, crops, livestock, schools, newspapers, banks, and a list of county officers for 1887. Proceedings and other activities of the Kansas State Board of Agriculture are in Part II.

Creator: Kansas. State Board of Agriculture

Date: 1887

Callnumber: SP 630.6 K13 1885-1886
