"On the inside of the Cuban Revolution"

On the Inside
of the . . .

Cuban Revolution,

— BY —

FREDERICK FUNSTON,

Lieutenant-Colonel and Chief of Artillery of the Cuban Insurgent Army.

A Short Account of
the Cause of the Revolution with Character
Sketches of a few of
the Leaders. . . .

The Composition,
Organization and
Equipment of the Patriot Forces, and how
they March and Live
and Fight. . . .

THE Real Facts about the Struggle for Independence told by one who Marched
and Fought in the Armies of Gomez and Garcia.

Col. Funston in the early part of the year 1896, offered his services without pay to the Cuban Junta in New York, and reached the Island on the filibustering steamer "Dauntless," which ran the blockade with arms and ammunition for the patriots. With the rank of captain he took charge of the artillery and participated in twenty-four engagements with the Spanish troops, four of which were attacks on fortified towns. In October, 1896, he was promoted to major, and in August, 1897, to lieutenant-colonel. He was the first man to use the dynamite cannon in actual warfare. In the battles of Monte Alto and Sama he was desperately wounded, and in December, 1897, fell into the hands of the Spanish troops and barely escaped execution, only by securing his release on parole by virtue of ready wit and steady nerve.

In his lecture Col. Funston graphically describes a number of the more important battles, and tells many of the incidents of the camp and march, and recounts his experience in prison and trial by court martial.
