# State inspector of coal mines reports

**Section 137, Pages 4081 - 4110**

These reports of the Kansas State Mine Inspector mostly concern coal mining, though by 1929 the scope of the reports broadens to include metal mines. The content of individual reports will vary. The reports address mining laws and mining districts; industry production and earnings; fatal and non-fatal accidents; accident investigations and transcripts of oral interviews; labor strikes; mine locations; mining companies and operators; and proceedings of mining conventions. The reports document the political, economic, social, and environmental impacts of more than seventy years of mining in southeastern Kansas.

Creator: Kansas. Inspector of Coal Mines

Date: Between 1884 and 1956

Callnumber: SP 622 K13

KSHS Identifier: DaRT ID: 210191

## FATAL ACCIDENTS

### FOR THE YEAR ENDING DECEMBER 31, 1929.

1. (Investigated by Glennon.) THOMAS MURPHY was severely burned at the Fern Bros. Coal Company on January 15, 1929, at about 11:40 a. m. He died the same day at 6 p. m. Mr. Murphy, foreman, and John Fern, cager, were in the act of moving a car which contained powder, which exploded, severely burning both men. Details may be read under the heading "Explosions."

2. (Investigated by McGavran.) TONY CAPUT, miner, was fatally injured by fall of rock on January 28, 1929, at the Motor Coal Company. This accident occurred between 10 and 11 a. m. Mr. Caput was working in room No. 3 in the north straight entry off the first east, off the main south. He was last seen alive about 10 a. m., at which time he was standing on his switch. An empty car was switched for him, and as this car was still empty at 12:10 the driver thought there must be something wrong. He went into Mr. Caput's place and found him covered by the fall of rock. He was taken from the mine immediately and taken to Mt. Carmel hospital, where he died January 30, 1929, from internal injuries. It was thought Mr. Caput was mining off a shot when the rock fell, which was 4 feet 6 inches wide, 5 feet 7 inches long and about 6 inches thick, tapering to a feather edge.

3. (Investigated by Shaw.) VICTOR CERNE, miner, was fatally injured at No. 9 of the Base Line Coal Company on February 7, 1929, at about 4 p. m., on the third east entry switch on the north side of the mine. Mr. Cerne had left his working place and was on his way out to the shaft bottom, where he stopped at the entry switch while the motor passed with a trip of empty cars. A steel rail being hauled on the fifth car of the trip caught his clothing, pushing him against the entry rib. The end of the rail passed through his left thigh, severing the arteries. He was taken to Mt. Carmel hospital, where he died the next morning, from the great quantity of blood lost and the shock from the injury. Mr. Cerne was 17 years of age and was working with his father at the face of the entry.

4. (Investigated by Sherwood.) JOHN MACHETTA was instantly killed at the Champ Coal Company on February 26, 1929, at about 8:25 a. m. by fall of rock. He was working in the first south entry on the east side of the mine when the rock fell, which was 13 feet long, 13 feet wide and 14 inches thick. The place was 14 feet from the edge of the brushing to the face. Mr. Machetta was in the act of driving a place for an air course when the outer edge of the rock caught him. A coal shot had knocked out all the props near the face and he had crawled over the brushing and started to shove the coal away to set some props, as he knew the rock was loose. This accident could have been prevented by first cleaning the brushing and then taking the rock down.

5. (Investigated by Shaw.) CALVIN WALTERS, miner, was fatally injured by fall of rock at the Western Coal & Mining Company Mine No. 21 on March 25, 1929, at about 9:30 a. m. The accident occurred in room No. 4 in the fourth east straight entry. Mr. Walters was in the act of mining off a shot of coal in a room neck which he was turning when the rock fell on him, crushing him so severely that he died from the effects of the injury at 12:15 p. m. the same day he was injured. The rock which fell on Mr. Walters was 5 feet long, 2 feet wide and 18 inches thick. There was an unseen slip at the outby end and a powder break at the inby end of the rock, giving the rock three loose ends, and would be termed as an unavoidable accident, which so frequently occurs in the coal mines. Mr. Walters was 66 years of age and is survived by his widow.

6. (Investigated by Glennon.) PAT O'MALLEY was fatally injured at mine No. 20 of the Western Coal & Mining Company on May 29, 1929, at about 9 a. m. He was taken to the hospital, where he died the same day at about 12:45. He was injured on the outside end of the parting in the first west on the north
