State inspector of coal mines reports

Section 147, Pages 4381 - 4410

These reports of the Kansas State Mine Inspector mostly concern coal mining, though by 1929 the scope of the reports broadens to include metal mines. The content of individual reports will vary. The reports address mining laws and mining districts; industry production and earnings; fatal and non-fatal accidents; accident investigations and transcripts of oral interviews; labor strikes; mine locations; mining companies and operators; and proceedings of mining conventions. The reports document the political, economic, social, and environmental impacts of more than seventy years of mining in southeastern Kansas.

Creator: Kansas. Inspector of Coal Mines

Date: Between 1884 and 1956

Callnumber: SP 622 K13

KSHS Identifier: DaRT ID: 210191

Item Identifier: 210191

State inspector of coal mines reports

Eleven mines in Bourbon county—7 deep and 4 strip—produced 18,849 tons of coal and employed 52 men during the year. There were 110 kegs of powder and 1,032 pounds of dynamite used by these mines. The coal averages 1 foot 8 inches, with an average overburden of 18 feet. The mines worked an average of 92 days.

The production of 10 deep and 1 strip mine of Linn county was 17,000 tons of coal. These mines gave employment to 92 men and worked an average of 118 days during the year. A total of 98 kegs of powder, 25 pounds of dynamite and 14,275 pounds of pellet powder was used. There was 1 fatality in Linn county which occurred at the Vantyle Coal Company. The coal will average about 2 foot 9 inches with an average overburden of 72 feet.

Franklin county had 14 slope and 9 strip operations which produced 10,051 tons of coal and employed 105 men, working on an average of 58 days during the year. There was one fatality in Franklin county.

There were 13 drift operations in Neosho county producing 1,262 tons of coal, and employing 38 men. There were 826 kegs of powder used in the extraction of coal. These mines working an average of 63 days during the year.

An estimate of 250,000 tons of additional coal production is made, covering mines which fail to report their production.
