State inspector of coal mines reports

Section 187, Pages 5581 - 5610

These reports of the Kansas State Mine Inspector mostly concern coal mining, though by 1929 the scope of the reports broadens to include metal mines. The content of individual reports will vary. The reports address mining laws and mining districts; industry production and earnings; fatal and non-fatal accidents; accident investigations and transcripts of oral interviews; labor strikes; mine locations; mining companies and operators; and proceedings of mining conventions. The reports document the political, economic, social, and environmental impacts of more than seventy years of mining in southeastern Kansas.

Creator: Kansas. Inspector of Coal Mines

Date: Between 1884 and 1956

Callnumber: SP 622 K13

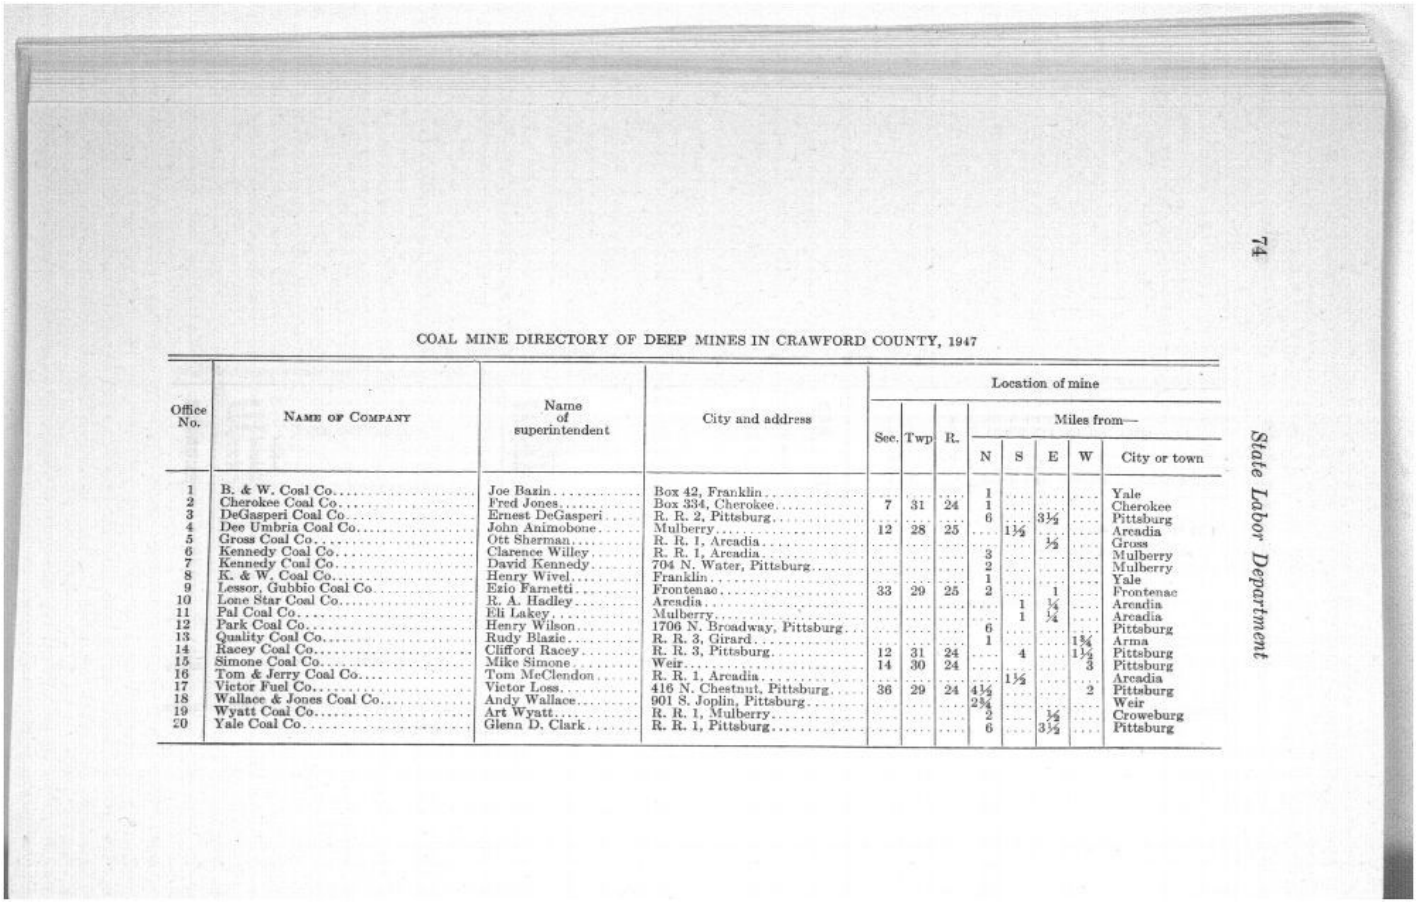

KSHS Identifier: DaRT ID: 210191

FATAL ACCIDENTS DURING 1947

1. On March 3, 1947, at 12:30 p. m., James Samuel Austin, an inmate miner, was killed by a fall of slate, while working at the face in room No. 141 located in No. 10 division. An immediate investigation by Mr. L. Shoup, pit boss, and Mr. Robert H. Murray, mine superintendent, disclosed the following facts pertaining to the death:

James Samuel Austin, 47 years of age, assigned to the mine department July 23, 1945, was digging coal when a piece of sand rock approximately eight (8) feet long, thirty (30) inches wide and twelve (12) inches thick, fell from a slip in the room killing him instantly. The division officer, David Haddow, had left his room about ten minutes before the accident. (Investigated by Robert H. Murray, Mine Superintendent of State Prison Mine.)

2. Mr. Mose Gomez, age 49, Girard, Kan., R. R. 3, a machine man, was seriously injured at the Quality Coal Company on April 29, 1947, at about 2:00 p. m. The accident occurred in the eighth east, first south stub back entry room No. 4. Mr. Gomez was in the act of unloading the mining machine when a pot rock ten feet long, eight feet wide, and from a feather edge to about fifteen inches in the center fell. Mr. Gomez received injuries to his head, back, and legs, and was pinned to the machine. He was rescued by fellow workmen and taken to the top where Doctor Lightfoot examined him, then rushed him to the Girard hospital.

The room is twenty-five feet from the entry, and from ten to fifteen feet wide. The employee said had he known the roof was bad, he would have shot it down. The machine helper, Art Allen, was not injured.

Mr. Gomez died on May 14, in the Bell Memorial Hospital, Kansas City, Kan. He had been taken there on May 13 for treatment. He is survived by his wife and two children. (Investigated by John Delplace.)

3. Charles Mulligan, age 43, was killed by rock fall on October 11, 1947, 1:00 p. m. at the Cherry Creek Coal Company. The accident occurred in the first east off the main north, room No. 5 about seventy feet off the entry.

This was Mr. Mulligan's first day and he was in the act of drilling a hole on the right hand side of the room. The room was sixteen feet wide and well timbered. The rock was a pot rock about ten feet long, four feet wide on one end, and one foot wide on the other to a cone shape 2½ feet thick. Just the east end of the rock struck him. It was cut by what we call "blind slips," one on the south end and one on the west end. These "slips" could not be detected until after the rock had fallen.

The machine man, Mr. Ralph Phelps, and James Benso, mine foreman, had just pulled the machine back from the face. The rock struck the cutter bar. Mr. Benso said they heard him yell and by the time they reached him he was dead.

Mr. Mulligan suffered a broken neck and other internal injuries. He is survived by his wife, two step-daughters, and two step-sons. (Investigated by John Delplace.)

State inspector of coal mines reports

SUMMARY OF METAL MINE REPORT, 1947

The total production of lead and zinc from the metal mines and tailing mills in the state of Kansas for the calendar year ending December 31, 1947, was 73,462 tons.

There were 52 metal mines in operation during the calendar year, in which 1,239 men worked an average of 148 days, and used 1,242,830 pounds of dynamite. Three fatal accidents occurred, and there were 158 lost-time accidents, and 684 no-lost-time accidents, making a total of 842 nonfatal accidents.

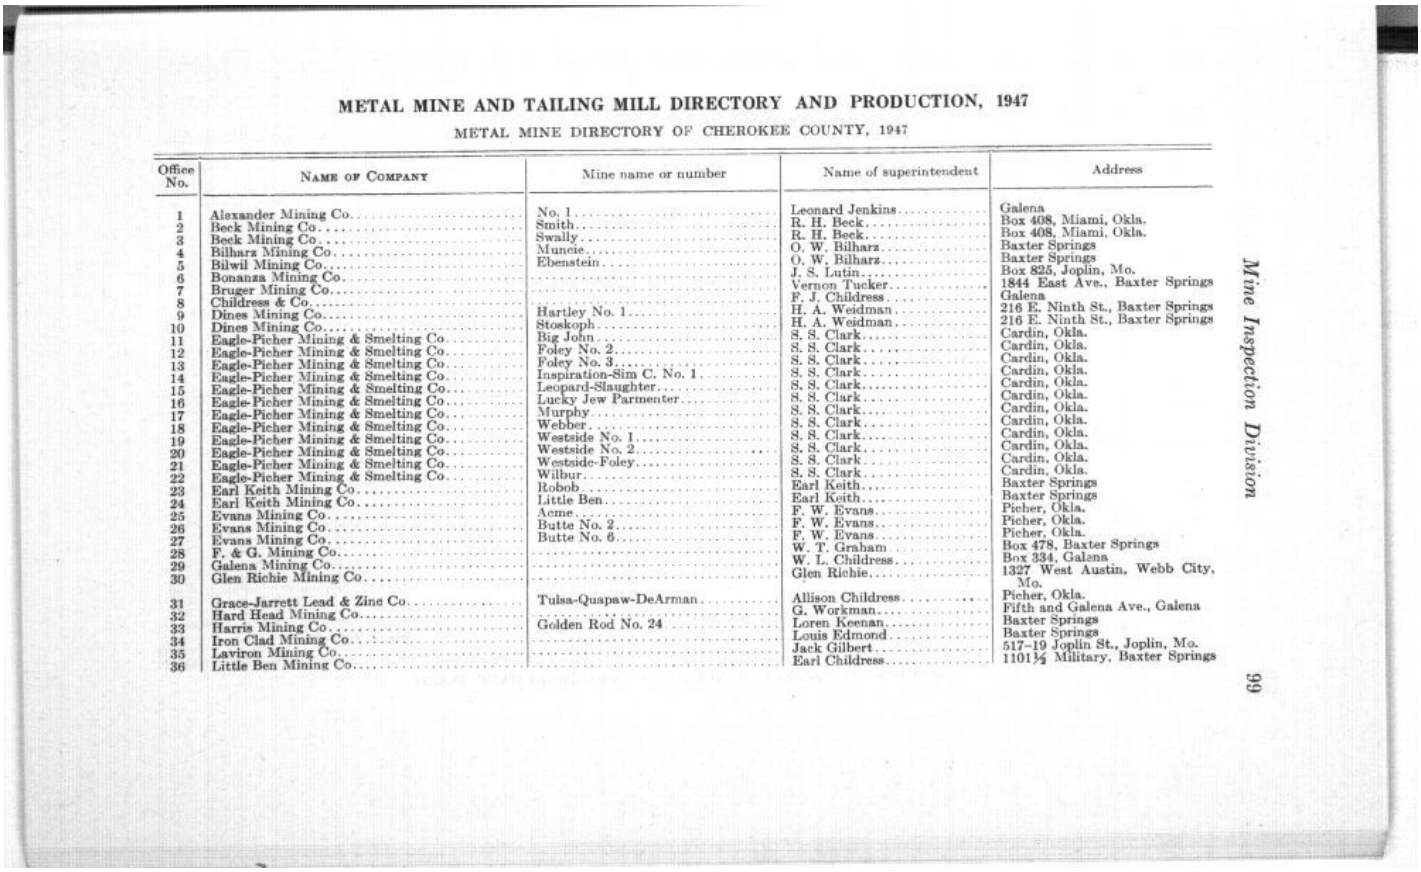

The two tailing mills in operation during the calendar year produced 3,321 tons of zinc and 23 tons of lead, a total of 3,344 tons. There were 74 men employed who worked an average of 133 days. There were no fatal accidents but there were 6 lost-time accidents and 8 no-lost time accidents, making a total of 14 nonfatal accidents.

TOTAL LEAD AND ZINC PRODUCTION IN BOTH METAL MINES AND TAILING MILLS, CALENDAR YEAR ENDING DECEMBER 31, 1947

	Zinc	*Lead*	*Total*
1. Metal mines	61,838	8,279	70,118
2. Tailing mills	3,321	23	3,344
Totals	65,159	8,302	73,462
