

Joseph H. Trego correspondence

Section 2, Pages 31 - 55

Joseph Harrington Trego was a physician and pioneer from Mound City. He came to Kansas in 1857 and became a "jayhawker." In this correspondence he talks of border warfare, formation of military units, politics, elections, crops, weather, military service in the Third Kansas Brigade Company D, 5th Kansas Cavalry, and life in Linn County, Kansas.

Mound City Sept 22 [1862]

My Dear Husband

I received/written the 22nd another yesterday reminding me of neglect. I wish thinking would answer the place of writing; you would have no cause to complain then.

It is Sunday morning. I went down to the garden became breakfast to see how many peaches there were left on the trees. I did not find many, the children commenced picking them, as soon as they were formed. Howard and Rebecca thought they were pretty play things.

However, my journey was not lost as I found the worms were working in the roots and would in time destroy the trees. I worked as long as I could then came to the house, found a few more things that needed my attention. By that time, I was almost ready to defer the writing until some time in the week as I have all Summer. I have just been out to eat Watermelon, almost the first this Summer, would not have had them if Hiram Hunter had not been here to get them for me. Everything is taken to town to sell and I have not an opportunity of getting anything only by chance. I suppose you did not that Hiram was Harietis.

brother, he was with the Third Reg last summer and winter

prisoners — They have been down in Missouri once, some of the union men came up to see what it meant. I suppose they were alarmed. They say they know which were Union and those that are not; they say (the colored men, I mean) that there were a great many men, told our troops, that they belonged to the Union. When the troops were gone, they would call them all kinds of names. There was a report yesterday that Jim Lane was

Joseph H. Trego correspondence

35

2.

authorized to raise four Reg of Black. Now I must tell you how Jennison Charles Clark is working against Capt Seaman/came here when things were [weighing to suit the men here, with an order from Jennison or rather from Robinson, to Seaman, Seaman told him if he did not go home, he would have him arrested. He went, came back in a few days with an order from Head Quarters, ordering Seaman to give him some kind of Office was the purport, it so happened that some of the darkies was tired of drilling went back to Fort Scott, so Charley was sent after them, but he refused. this was a good joke, but Seaman did as ordered. Charley was in the dark again. When he came again, tried to convince the darkies that if they would go back to Lawrence, would get their arms. This was after Dr. Michel had scared them, and they began to think that it was necessary that they should have some defence.

And another reason they were easily persuaded they had been wanting to go back. (Hariet says to get around the women, that has nothing/=) and get a little Whisky too. Charley gave them a \$5. bill, and told them to get some beer. When the money was gone, they took the Flag, and started. By this time the matter was inquired into, and Charley soon put into the Guard house and kept there all night. I have not heard much of him since. ...

have had peach pie, but dont enjoy them half so well as I would if you were here to share with us. Almost every meal some of the children say, Mother, dont you wish Father was here to have some too, sometime I feel more like getting up from the table and leaving, than eating. Then I think perhaps next summer you can be with us, and try to console myself in that way of thinking I want to see you so much I almost think I will go to Helena.

You say you want I should write and tell you how I feel. I shall have to acknowledge that I am incapable. When you come home I will try and tell

Joseph H. Trego correspondence

36

3.

you. If you ever get home again, it is doubtful about my excepting your resignation to leave us again

I wish there was some way that you all could get away from there.

Katie told you about the party she had. Mrs John Watters girls were here, and Sarah, and Mary We all wished you and several of the combere here to enjoy the party with us.

Oh! how I wish the war was over, and slavery abolished. Sometimes I feel as the I could help to kill off some of a our own men, it is realy discouraging to see how they manage. All the best men here are wishing that bombshells will be thrown into the White house soon.

The newspapers report great things of Metellan's late skirmishes, but I don't suppose it will amount to a row of pins.

It is reported that Calking M. Clay is ordered to report to Gen Butler. It will make a strong team. I wish you could have such generals in your department

Dont despair perhaps there will be a change for the better. It was reported that Gen Steel is to take Gen Curtis place. I don't know as it will be a satisfactory change...

A part of the time Eleanor has been combing my hair while I have been writing one of us will have to wait pit don't work well together. How wished to know about our Cow. We have had very near enough cream all Summer. A few days ago she lost the other cows, came home, seemed very discontented, and that is the last we have seen her.

It has been so dry, Simpsons cowe failed to make butter for us. We were without butter for three weeks; I bought 5 lbs. week before last, that was very nice.

After you left I got Jim to make the garden into sweet potato hills. He made room for 215 plants, only 20 of them died, the rest grew finely,

Joseph H. Trego correspondence

. 37

only charged 75 cts for the work, got them, set them out, watered them. When they were nearly large enough to eat, Harit found six large hogs in, one morning, nof course the garden was plowed. Some of Franks carelessness leaving the bars down. Edwin sold Nick to the artillery comp

I think I have forgotten to tell you about little Harry s death, died in August with the treenter. Mabel just escaped with her life, she could neither neighter walk nor talk for a long time.

Ed is quite unwell with tooth ayche and face

Well I left off very suddenly restorder and have not seen the time since to write The time passes away and it is night before I am ready for it. The first of the week I commenced clearing the Bookshelf that you put upstairs we brought the books and put in the Book case thought I would finish the next day and tisnt done yet. I have been sleeping down stairs all summer. It seems now I would rather sleep down stairs but I want to fix this room ready for com I cant help thinking you will come to see us. I suppose your Colonel is dead as such is reported. I only hope Montgomery will take his place

It looks a little now, as if the war would amount to something or rather you know what your are fighting for, but of corse there will be more desperate fighting. I get more and more anxious every day to see the end. I was visiting at Judge Lowe's on Friday Miss Sarah Watts was there aske said they had lately received a letter from Lt Morse

I hope when this reaches you, it will be cool weather and soon think
you will be improving in health, and spirits, and sincerely hope there will
be a change to cause general rejoicing. When the cow came home her milk
wasnt good, turned the calf in a few times, and we get a right smart lot of milk
now. Tom and Rory Balls have been getting some hay for them, and Old Comet.
Ind he is fat as needs be. Every since Olathe was sacked there has been a
picket guard every night. The citizens take turne or pay \$2 fine, one night

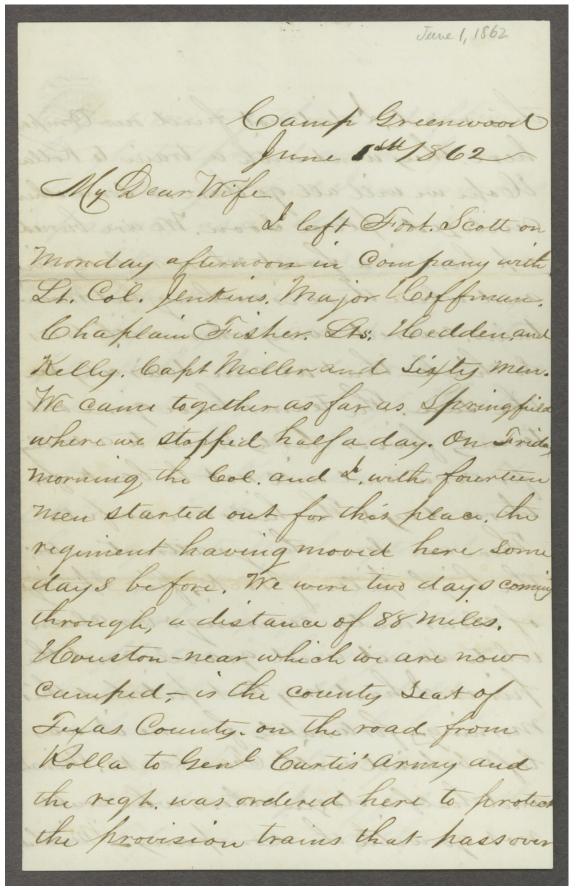

9

38 5. there was a man came near the line, was halted, went on, the second line fired at him, chased him, he went in the brush, that was the last of him, at several different times they brought in prisoners. Wheeler, and Curry brought in a horse thief the first night they were out. . . . Mrs Lowe tells me they have received another letter from Lt Morse, saving you were not so well, I want very much to hear of your recovery. I am very near sick thinking of your situation. Please forgive me this time for neglect From Your loving Wife

Lawrence 1st Mo 4th 1863

Dear Friends.

This is a cold and very snowy day, though not near so cold as 1st 2nd & 3d days were. We staid 7th day at night at Brooklin, and coming from there to Lawrence the next morning, I thought I should have frozen, and believe I should, if I had not sat down on the bottom of the wagon, with my back to the cold wind that was blowing a perfect gale, the men had to run most of the way to keep any thing like comfortable.

I went out shopping this forenoon, and did the very best I could in selecting your articles.

Alice I feel a little doubtful about the ribon, I came very near loosing the pattern, thee gave me, and it was only by accident that I found it again, and it was a little soiled which changes the color a little, if the ribon will not do, send me another pattern and I will try again. The stores here are first rate, fitted up in Philadelphia style. I bought some very good calico this morning for 16-2/3 cts per yard, there is a great deal of it, at one of the stores here. I will send a piece of what I got at that price.

Well I must tell you that I like living here first rate. It would take a great deal to induce me to come back to Mound City to live, I know, if you two families were here, you would not want to go back there again, business is brisk, and every body is stirring about as though they had something to do. There are two good milliners here.

Maria I have seen a beautiful sleeve pattern, that I know thee would like it would not be hard to make and is so neat, to be trimmed with narrow velvet

Atkinson July 21st 1863

My Dear Little Wife

Since my last writing I have been on the go almost constantly. The low water in the Mississippi which prevented boats from running made me considerable more trouble and some more expense, having to continue on by rail from Quincy. I left Galesburg Monday morning the 13th and came around to Colona station where I got off thinking I could get a conveyance to Deanington without difficulty, but there just happened to not be one horse in the place so was obliged to foot it for about five miles to Geo. Sinclu's. Geo. carried me on to Henry's I was some tired and rested there the next day. On Wednesday Henry & self drove down to Allen's. Found the folks flourishing, had all the ripe goose berries and cherries we wanted for one day. Kezia felt very badly for some time and the absence of Mary Ellen but presently she recovered from it and my stay there was a very pleasant one.

Wilmerton proved to be the man from whom Sherman was to obtain money and before he would do anything, he must see the records, so Mr Sherman and wife, Wilmerton and myself started the next morning to Aledo, and had the whole matter fixed up there at once. The next day Henry and I returned to Deamington I felt unwell in the morning, when I started out and that afternoon I had a good deal of fever and had to lay by. It prevented me from visiting at Yardley's only giving them a call, when I first came to the place. Both the Lizzies came to Henry's the afternoon that I was sick. Saw no one else in that place but Scudder and family who were at J Allen's when I returned from Aledo.

The next morning--Saturday--Willet drove me down to Coal valley where

I took cars for Rock Island. I had Will fill some teeth for me, took dinner
with him, and tea at Mr. Riggs; called at Conant's after dark finding the folks
all right side up, and was at the station at 10 0'clark p.m. to take cars

Joseph H. Trego correspondence

2

could'it for Atkinson but could not make the trip because the night express dont stop here now. Will was at the depot with me and so I went home with him where I stopped until Monday morning. Arrived at Barclay's yesterday where I found Mother and Amelia. Mother thinks she is afraid to go to Kansas now but will probably go next spring if it should prove to be safe place by that time. They have had seven weeks of dry weather and cold too, lately, which has made crops late and very indifferent The roads were miserably dusty, traveling in cars was horrible and my eyes are much worse than when I left home. On Sunday we had heavy showers which seems to have extended over a great deal of country. Mr Nowers says they had four inches fall at this place. I shall start to Chicago, where I hope to find a letter waiting for me. It is so cold and disagreeable to day it makes me feel agueish and of course dont take very much pleasure in anything. If I don't find it to my probable advantage to remain in Chicago longer than three days I will finish up my visiting in that time, but if anything can be done to effect a cure of eyes I may remain longer. Mr Nowers is selling goods in this place and Tom Jr is with him. They seem to be doing a good business. Barclay is making himself a good home where his business will in time be good perhaps; certainly if there should be a good market for trees in Iowa and Nebraska as the R. road is extended westward. Ill is a land of plenty but for climate or any other attractions it is not at all inviting. If southern Kansas should prove capable of producing enough to support a large population and am very well satisfied now that it will get far ahead of this country at the same age of improvement

H M. There has moved his family to Galesburg, for the purpose of educating their girls. He and Dow are in the livery business. Mrs health is very poor. Mrs Dow looks pale and unhealthy Mary looks well but is growing old rapidly, or has at least since I saw her in /59. Helen looks like Lettie used to. Vinia is troubled very much with weak eyes. Fred is a queer looking,

Joseph H. Trego correspondence

3.

course looking, dont care for anything at all kind of chap and Frank seems to be smart. Willet is just as he used to be only that he has grown some. Lu.is an uncouth girl in behavior but seems to be a regular genious to study. Little Charley, Yardley's boy dont talk and I could not make anything out of him. The girl is a good solid healthy looking child and seems smart enough. Watson's girl is a little frisky thing, about like Rebecca, and Kezia's charge is a little, fat, contented babe that will probably be very much of a comfort to her and Allen as they are now living alone in the east end of the house. I did not see its father. It seems that Watson as well as most of the people in the neighborhood, do not look upon him with any favor. One reason for it is that his loyalty is very much doubted. Mary Ellen was unfortunate in making his acquaintance and equally fortunate in being called away so early. We have no fires and I have got quite cold sitting still so long so will call this sufficient for the present. With much love to wife and girls, some to Maria but none for our naughty troublesome boys, good bye

Your affectionate H

which proves to be very much of a hindrance, I left Fort
which proves to be very much of a hindrance, I left Fort
Scott the day after the Snow storm which was a very pleasant
day as has been evry day since, Have had rain two nights but
it was of no Kind of inconvenience. For three days now it has
been remarkably warm and pleasant. All the houses along
our route so far are deserted except one, and in Missouri we
saw the ruins of many that had been burned. Apples on the
trees all spoiled by frost until within the last three days we find
plenty that are not damaged. It seems that there has been no freging
here yet. You are no doubt aware that bapt baskell has been ordered
+ 1, 100 · 1 · 1 of I of the ill and ill
to report at St Louis when relieved at Fort Smith. It will require
about two months to turn over to his successor the vast amount of
1 1 + 1 . 1 . 1 . 1 . 1 . 1 . 1 . 1
property now in his charge and to get his business property ad-
= justed before leaving for St. Louis Nont Know what changes may
take place before that time but it is quite possible that I may
return home about New Year. We have been receiving a mail from

Joseph H. Trego correspondence

First Scott every few days and I hope to hear from you before many more days pass by. Write at least once every week tell me all about every thing, how you have disposed of Blackhird how the pony Quets, if you have been to Hahn's, how the militia prospers, whether the baby grows velve. I. Master Thomas came up from the army, got in this morning. Was going on to Fort Scott but meeting us I understand it is his intention to return with us, no probabillety that we shall so much as have a little brush we get to First Smith. Nothing of particular interest has occurred on our march and as the country is desolated there has been nothing of much interest to see on the route except its desdated appearance merely. He have a very good cook, a full supply of provisions, laid in at It Scott, and are living well enough. Allegether & am very well satisfied with everything but having to be away from wife and children. We have with us, that is, eating and lodging on our tent, a Mr attinson, aged about fifty, who was formerly a slaveholding merchant in Fort Smith and was driven not two years and a half ago. He is now returning to his family who are get at Fort Smith, His son whom he left charge of his affairs has since gone into the confiderate army. I shall not have time to write you any more this time but May again before we reach our destination. Hoping you will not find they nights too very cold, and with ever so much love I must say good night from your Husband

	Ay Dear little Wife
	You will see by this that we have arrived at the
	place of our destination, and all right. The time consumed in
	making the trip put the office business considerably behind hands
	Is much that we have been very closely confined to the office ever
	a all for the first of the first of the second of
	Since. The have now been here ten days, Desterday being sunday &
	took a little stroll over the city. The river at this point runs nearly
	north and the streets, like the Garrison, run n. Exs. w. and n. w & s. s.
	The principle business street is composed of fine large brickstone
	houses, a few of them very large. The other streets are largely compound
	of old tumble down frame Shops, sheds, and some leg cabins, with an
	occasional rich establishment displaying a great waste of material
	and a greater lack of good taste in its arrangements; four conthern.

is the mistletoe which can be seen, every where through the timber now the leaves are off the trees, growing on oaks and Elms chief about our march, we did not have one hour of disagreeable weather while we were on the move. The had two might of rain, and one afternoon of showing wather while in happened to a day waiting for the bull-train. Our scouts captured about have them ready to hang to telegraph poles whenever the wires may but cut, agreeably to his orders lately issued and which you have probably seen in the papers, Gent Blunt is here and likely to Islant reinstated. They are on very friendly terms and have had Several big drinks at which mchel got gloriously drunk. Haskell who never druks nor is present at any of hun. Days that Islant never gets drunk, and has always been ready for duty, which he attends to very promptly, though he does certainly imbibe largely. Capt Hastell shows himself a high toned gentleman who dispises vulgarity, and also in his trisiness requirements, which is hum unpopular with many of the officers here who a must say are generally a disgrace to our army, & therefore place much confidence in what he says in matters of fact or of opinion.

Fort Smith Ark. Wednesday eve Dec. 2d, 1863. Nine O'clock p.m.

My Dear Little Wife,

I have just learned from Mr. Tomlinson that he intends setting out to-morrow morning for Kansas, so I came back to the office as soon as the Lodge closed to dot a few lines to send by him. I wrote you only a few days since and sent by way of St. Louis as there is a regular mail that way three times a week each way and I think I told you then to direct letters by way of Springfield Mo. If not I will now, and also direct to care of Capt. J. G. Haskell, A.Q.M. U.S. Vols.

I was made glad, very glad, on Friday evening last by receipt of your letter of the 20th ult. Hope you will succeed in getting the church made into a school-house, and a good teacher inside of it.

We heard to-day of the train which left Fort Scott about the 20th. The advance is expected here to-morrow.

We moved into quarters last week and now have things in good running order. The rooms are large and pleasant, each one has a fire-place, though it has been so warm all the time since came here-except about three days-if that fires are but little needed indoors. While I think of it/you have not yet sent the jewelry I spoke of in my letter you need not do so at present as the probabilities are strong that I shall be at home by New Year if not sooner. There is nothing new for me to write about, Mr Tomlinson can you that all about the place and also how I have been flirting around with the secesh ladies. I wrote to Rebecca yesterday, so I did

If I leave here in time to get home before Christmas I will get some mistletoe to carry home. It is very plenty along this river. John, the African who attends in the office wishes me to write for him this evening. He has a beauty somewhere in Kansas to send love to I suppose but don't know

Joseph H. Trego correspondence

10 yet, probably will when I get his letter written. My love to Kate and Eleanor and Helen and Rebecca and Sophy. I think this will do for this time so good night my love-from your affectionate Husband
