

Hematite Artifact from Greenwood County

This hematite artifact was found in Greenwood County and donated to the Kansas Historical Society in 1984. The broken artifact still shows four grooved lines, though what its original function was is unknown. Hematite is a relatively soft and fine-grained mineral form of iron oxide. It is easily carved and polished.

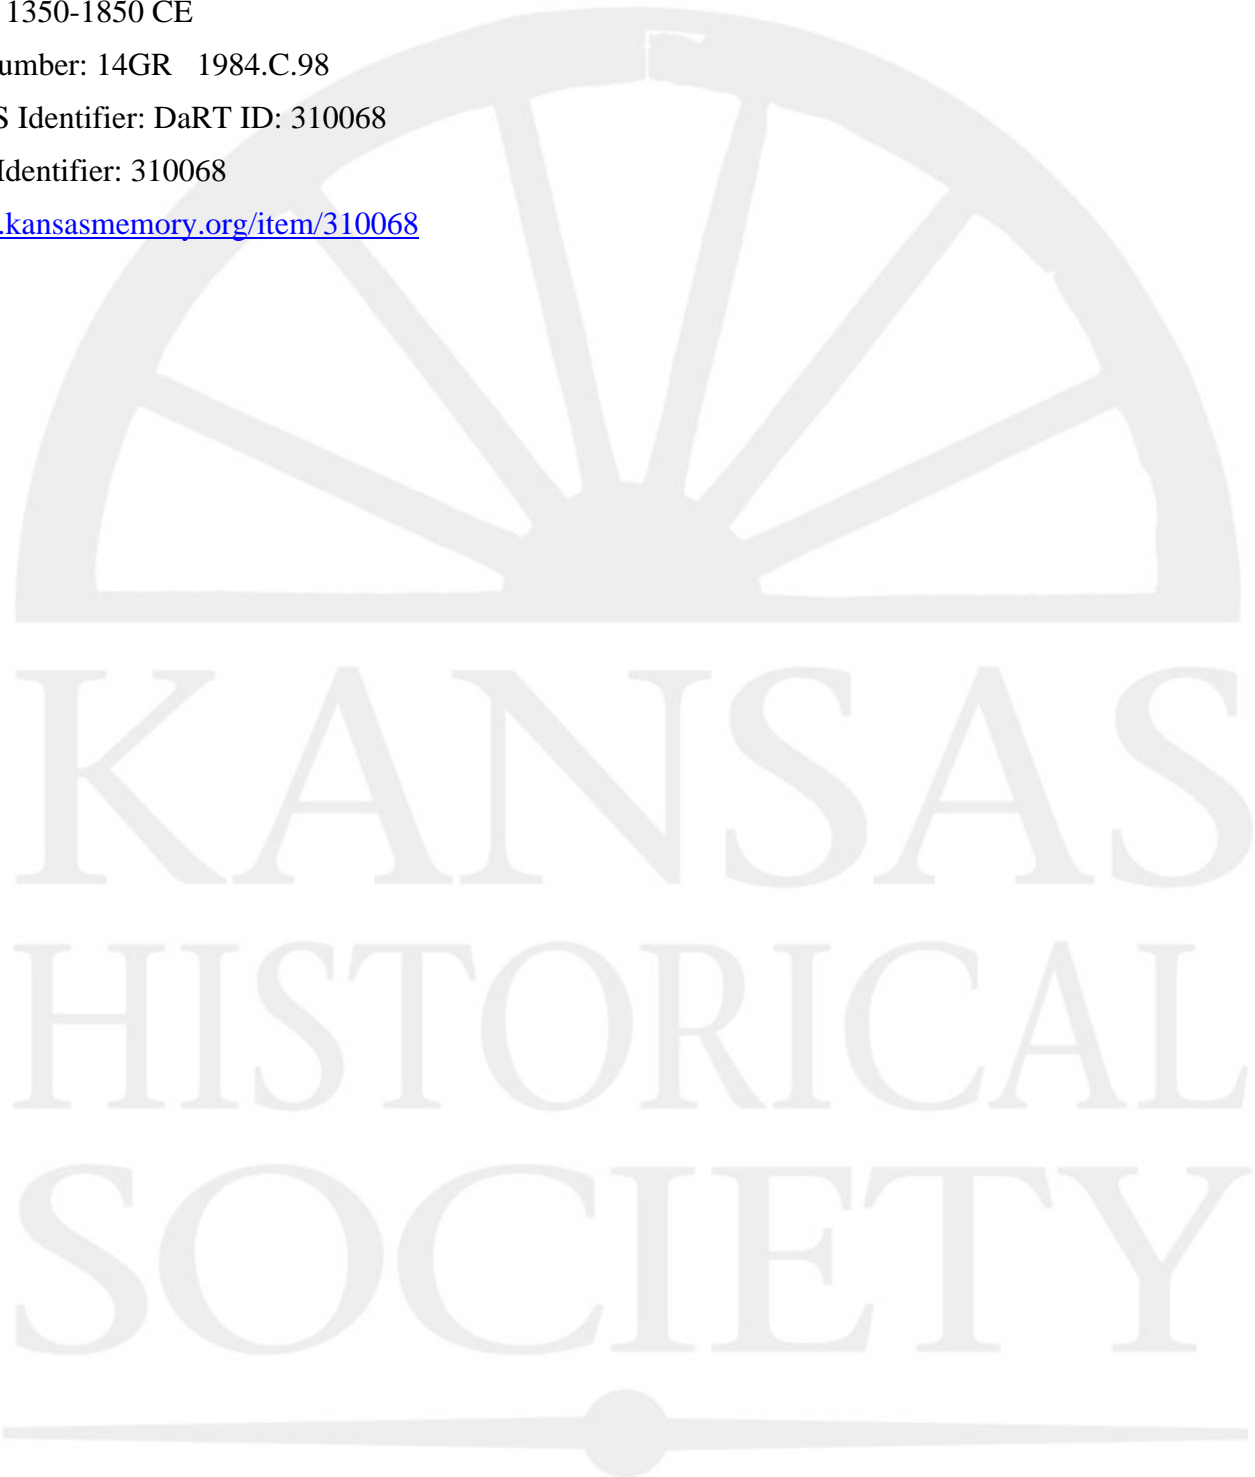

Date: 1350-1850 CE

Callnumber: 14GR 1984.C.98
