Corner-Notched Arrow Points from 14EL313

These six arrow points were just a few of those recovered at the Kraus site in Ellis County during the 2015 Kansas Archeology Training Program field school. Archeologists consider corner-notched points to be the earliest form of arrow points that are found in the Great Plains. The notches aided in hafting the point to the arrow shaft.

Date: 1000-1100 CE
