Rim Sherd from the Wullschleger Site, 14MH301

This rim sherd fragment was recovered from the Wullschleger site in Marshall County and donated to the Kansas Historical Society in 1961. The potter used a small stick or twig to drag through the wet clay, creating the designs on both the exterior and interior of the vessel. The site was occupied periodically from the Early Ceramic to the Late Ceramic periods.

Date: 1500-1800 CE
