

Fresno Arrow Points from the Sharps Creek Site, 14MP408

These three Fresno arrow points were recovered from excavations at the Sharps Creek site in 1968 by Kansas Historical Society archeologists. Archeologists identify Fresno points as being unnotched with a triangular shape. The three points are made of Permian chert. All were heat-treated prior to their completion to make it easier to knap. The Sharps Creek site is a Great Bend aspect (ancestral Wichita) village in McPherson County.

Date: 1500-1800 CE
