

## **Alibates Scrapers from the Saxman Site, 14RC301**

Shown are five scrapers that were collected from the Saxman site in Rice County and donated to the Kansas Historical Society in 2017. Scrapers such as these would have been hafted on a handle and used to scrape hides. They would have required periodic resharpening. All five scrapers were made of Alibates flint, a silicified or agatized dolomite from the Canadian River valley in the Texas panhandle. The Saxman site, a large Great Bend aspect village, was occupied by ancestral Wichita peoples.

Date: 1500-1650 CE

Callnumber: 14RC301 2017.F Weimer donation
