

Beads from the Mem Site, 14MN328

These beads were excavated in 1986 during a highway salvage project undertaken by Kansas Historical Society archeologists and Kansas Anthropological Association volunteers at the Mem site. The black glass ovoid bead, of European manufacture, was recovered from the upper fill of a cache pit. The disc-shaped turquoise bead and the two ceramic beads were recovered from the same cache pit. The Mem site, in Marion County, is a Great Bend aspect, ancestral Wichita village.

Date: 1500-1800 CE
