## "PAK RAT"

... AND ONLY PAK-RAT GIVES YOU  
ALL THESE *Plus* FEATURES ...

**FULLY AUTOMATIC CONTROLS**  
Automatic packing controls are standard equipment and can be operated from either side of the unit. Compaction cycle time is less than 20 seconds.

**TOP DOORS "STANDARD"**  
Full size top doors that fold back for easy dock loading and large container dumping.

**LOWEST OVERALL HEIGHT**  
Goes under limbs, eaves and other restrictions where larger units are limited.

**SEALED TAILGATE**  
Heavy side locks close securely insuring 12 inches of liquid tight seal.

**HANDY ONE-TON TRUCK**  
Fast, maneuverable and compact. Zips in and out, picking up and adding more stops per hour.

**LOWEST CAB ENTRY**  
Easy in and out eliminates driver's fatigue. Enables driver to make more pickups per day with less effort.

**FOLDING STEPS STANDARD**  
Quick lock-up steps on each side of unit keep loading height to a minimum.

**SIDE SKIRT GUARDS**  
Side skirts, front and rear, protect side of body and finish from mud, salt and other damaging elements.

... ALSO GIVES YOU THESE DOLLAR SAVING ADVANTAGES

- |                               |                               |
|-------------------------------|-------------------------------|
| \$ Low initial purchase price | \$ Low gas consumption        |
| \$ Low maintenance costs      | \$ Low depreciation           |
| \$ Low license fees           | \$ Low tire costs             |
| \$ Low insurance costs        | \$ No federal highway use tax |

CUTS EXPENSES TO GIVE YOU MORE PROFIT DOLLARS!

**PROVEN**

**YEARS OF EXPERIENCE . . . IN THE FIELD . . . ON THE JOB . . . HAS PROVEN PAK-RAT'S DEPENDABILITY.**

Quality workmanship coupled with advanced engineering insures trouble free, long lasting service.

### POWERFUL DOUBLE-RAM SYSTEM

1. Scissor unit straightens out at rear for maximum power.
2. Curved plate-steel ram blade gives greatest possible strength.
3. Heavy structural steel tubing combined with thick steel plates assures twist free travel.
4. High pressure wire braid hoses used throughout entire system.
5. Only two readily accessible grease points on scissor.
1. Arms fold compactly allowing full hopper area.
2. Economical double-acting cylinders assure long trouble free service.
3. Hardened chrome plated cylinder shafts for durability and long seal life.
4. Twin rams coupled with double scissors reach full power at lower working pressure.

The PAK-RAT is equipped with two 4 inch heavy duty double acting cylinders that pack the load to the rear and keeps it there. Equalizer alignment device demands that both cylinders work together with no-twist. This unique system creates equal thrust on both sides of blade insuring evenly packed loads. The equalizer has only two easily accessible grease points. Curved, rugged blade design adds strength plus roll action of refuse.

ALL PATENT RIGHTS RESERVED

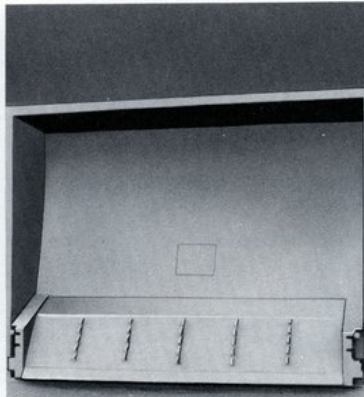

### CURVED RUGGED RAM BLADE

Smooth, self cleaning ram blade extends over rear for easy washout. Retainer teeth on lower blade surface hold refuse down on floor which eliminates fall back in hopper.

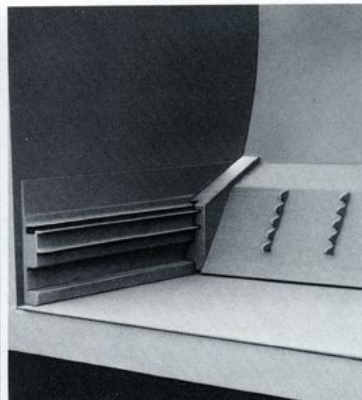

### SMOOTH "NO SNORKEL" FACE PLATE

This outstanding feature eliminates refuse hang up and sticking frozen loads when ejecting at disposal site.

### TRUE BLADE ALIGNMENT

Heavy, structural steel guide runners on each side of body and on ram demand true blade travel. Eliminates wobble, twist and uneven movement.

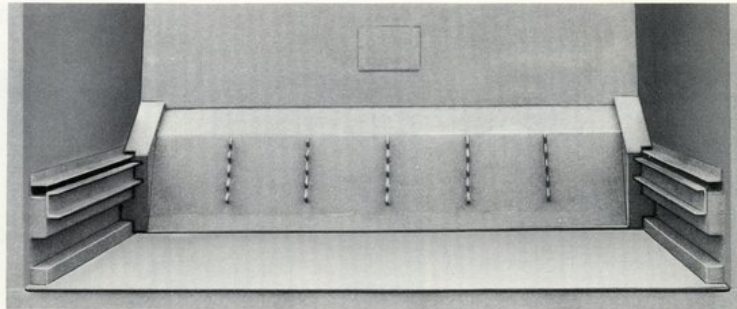

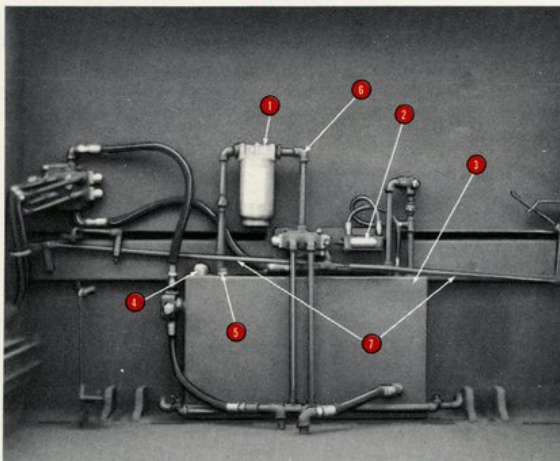

## Pak rat flyer

### EXCLUSIVE SMOOTH FLOOR DESIGN ALLOWS LOADS TO PACK EVENLY

PAK-RAT'S exclusive smooth floor design allows refuse to be distributed and packed evenly, even when continuously loaded from one side. This proven feature is preferred over I-Beams and valleys on the floor which may possibly interfere with refuse crossing over and centering during compaction process.

### A MASTER CONTROL PANEL THAT IS COMPACT AND READILY ACCESSIBLE

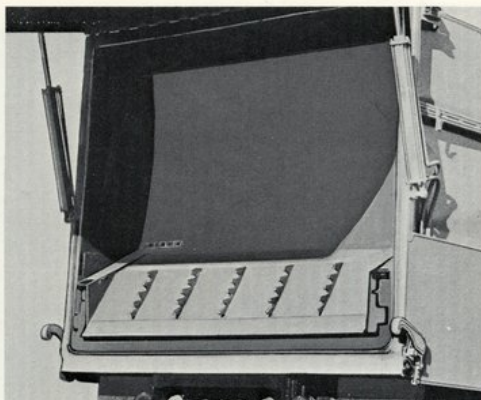

1. Large extra heavy duty filter system — cartridge exchange type.
2. Hydraulic actuating cylinder makes packing controls automatic, also acts as secondary safety protector for entire hydraulic system.
3. High capacity hydraulic oil reservoir, completely baffled, and equipped with brass shut-off valve for ease of servicing.
4. Reservoir is equipped with large intake strainer to prevent foreign matter from entering oil system when changing or adding oil.
5. Oil level dipstick is readily accessible and easy to read.
6. All plumbing is standard black pipe and fittings for ease of service, available at local supply houses.
7. Packing valve is operated by mechanical control rods for positive action. Control rods are equipped with threaded clevis for simple adjustment.

Master control panel is protected from possibility of fire and refuse, yet readily accessible should repair and servicing be required.

### . . . AND HERE ARE THE RESULTS OF THE PROVEN PAK-RAT SYSTEM

#### EJECTS LOAD CLEAN

Self-cleaning . . . blade extends over rear for easy washout. No snorkel buildup.

#### REALLY PACKED . . . ALMOST BAILED

Pak-Rat's proven system packs loads to the full capacity of the one-ton truck . . . packed so tight refuse is literally "bridged" as it is ejected . . . almost bailed!

## "PAK RAT"

. . . EXCLUSIVE CONTAINER SYSTEM  
A COMPLETE CONTAINER SYSTEM FOR PAK-RAT PACKERS

### HEAVY BARREL LOADER

Lifter loads heaviest barrels with fingertip ease. Fast, efficient operation.

### COMMERCIAL CONTAINER SYSTEM

The PAK-RAT lift unit combined with the large container is ideal for scattered commercial stops.

### NO SPILL

Container lifter is designed to raise up and empty containers without spillage.

The full line container system that fits every need.

The remarkable PAK-RAT lifter attachment is designed to entirely eliminate the need for lifting, thereby reducing fatigue and back strain as is common with other methods. Finger touch control does all the work.

### RESIDENTIAL COLLECTION CONTAINER

Heavy duty, 65 gallon, balloon-tired pull-out container to service back door collections. Ideal for cleanup jobs and one-man operations.

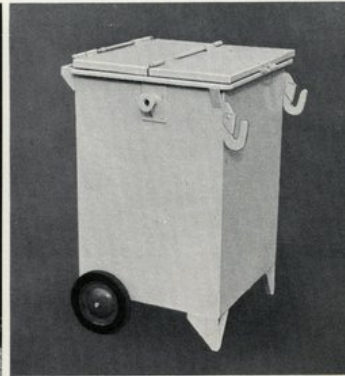

### COMMERCIAL 170 GALLON "JUMBO" CONTAINER

PAK-RAT's largest . . . designed for apartments, hospitals, service stations, and other places where a large volume of refuse is generated.

### COMBINATION RESIDENTIAL AND BUSINESS CONTAINER

85 gallon utility container has new, square design which requires less space. Large rubber-tired wheels makes moving easy.

*...the company that makes it happen!*

Main plant — Hesston Farm Equipment Division — Hesston, Kansas

Yes, for twenty-five years the Hesston Corporation has been the "Make it Happen" Corporation. Engineering and developing new products has been a way of life.

This fast growing Corporation has plants coast to coast, from Utah to Illinois, around the world in Italy and France. Plants turning out quality products in agriculture, refuse handling equipment, mowing machines, office furniture and beet & potato equipment.

"Hesston" . . . is the make it happen company, developing new quality products YOU CAN DEPEND ON.
