FIELD PROVED CORN HARVESTER

**CUT • SHELL • SHRED • & SPREAD
IN ONE OPERATION!**

**THE
NEWEST
WAY
TO HARVEST CORN
PROFITABLY!**

Quickly turns your combine into a 4-crop harvester!

NO SPECIAL ATTACHMENTS! NO EXTRA EQUIPMENT! NO TROUBLE!

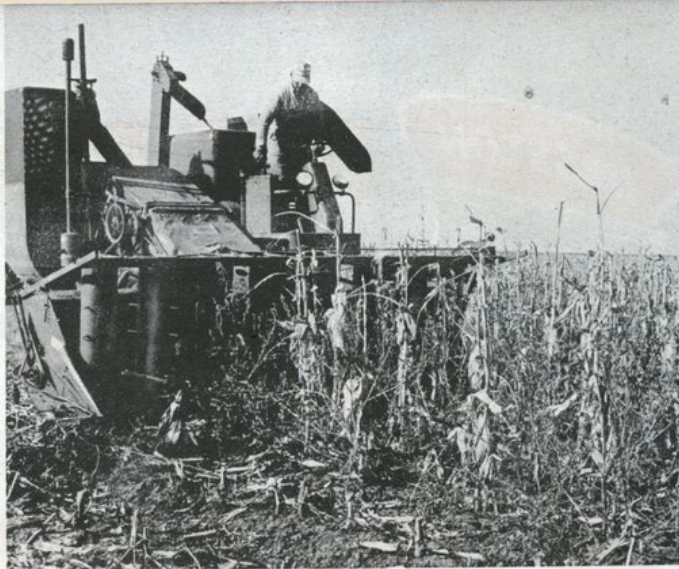

Field proved corn harvester flyer

Even in Thick Corn and Heavy Weeds Hesston's Corn Harvester

CLEANS THE FIELD!

It's the newest — *most profitable* — way to turn your combine into a genuine corn combine! Hesston's Corn Harvester lets you do four jobs at once.

It draws the entire stalk through the machine, allows you to cut . . . shell . . . shred . . . spread **IN ONE OPERATION!** Eliminates the need for a special stalk cutter!*

This photograph shows HOW CLEAN IT LEAVES THE FIELD!

The area at the left (1) was harvested by ordinary corn head — the center area (2) by the Hesston Corn Harvester. Standing

crop is seen at the extreme right. JUDGE THE RESULTS FOR YOURSELF!

The New Hesston Corn Harvester is the most inexpensive method of corn harvesting ever developed!

Initially it's a *low-cost* investment for the farmer! Installation is fast, easy, and simple! Requires minimum maintenance . . . and no special attachments or equipment are needed — the unit simply bolts onto the platform cutterbar!

*Using a Hesston Straw Chopper on your combine assures an even better job of shredding and spreading.

ACTUAL HARVESTING TESTS PROVE

The Hesston Corn Harvester *does the job* in heavy crops, even under extremely weedy conditions. It is equally efficient in soybeans, cattail millet, milo maize, or corn . . . making your combine a more versatile "four-crop" machine — quickly and inexpensively. The absence of snapping rolls practically eliminates shelling losses, and

makes harvesting much safer.

It is a timely answer to the farmer's quest for an economical way to broaden the profitable use of his combine — thus realizing a better return on one of his biggest machinery investments.

These Features do the job

Economically . . . Easily . . . Profitably!

- * DEPENDABLE SINGLE-BELT DRIVES
- * MOST EFFICIENT RETRACTABLE FINGERS
- * VERTICALLY MOUNTED BALANCED CYLINDERS
- * AMPLE CLEARANCE FOR HEAVY CROPS
- * FAST, SIMPLE, EASY INSTALLATION
- * LOW-COST — MINIMUM MAINTENANCE
- * SIZES TO FIT MOST COMBINES
