Straw chopper flyer

Straw Chopper

**FOR MOST
COMBINES**

**CHOPS STRAW TO
SHORT PIECES**

**MAKES YOUR
PLOWING EASIER**

**IMPROVES
SOIL**

Here is the chopper that will **REALLY** do the job you want it to do: **PROPERLY** shred and chop straw and other crops...spread it evenly... make discing or plowing it under easier. And the Hesston Straw Chopper is **BUILT** the way you want it: light in weight...ruggedly constructed...vibrationless...easily installed and easily dismantled. It will pay for itself over and over again in time saved...plus, improving the condition of your soil.

Compare These Features!

★ FOUR-BOLT MOUNTING

Easily removed for baling, etc. By removing two rear bolts, unit hangs by front two bolts, permitting easy access to straw racks and inside of chopper for servicing.

★ ADJUSTABLE SPREADER

Eight fins on baffle controls straw spreading. Spreads from hood width to width of cut.

★ SPRING-STEEL HAMMERS

Held in position by centrifugal force. Will not bend or wear quickly. No sharpening necessary. Reversible feature doubles life.

★ NO VIBRATION

Dynamically and statically balanced — smooth operation assured.

★ REVERSIBLE CONCAVE

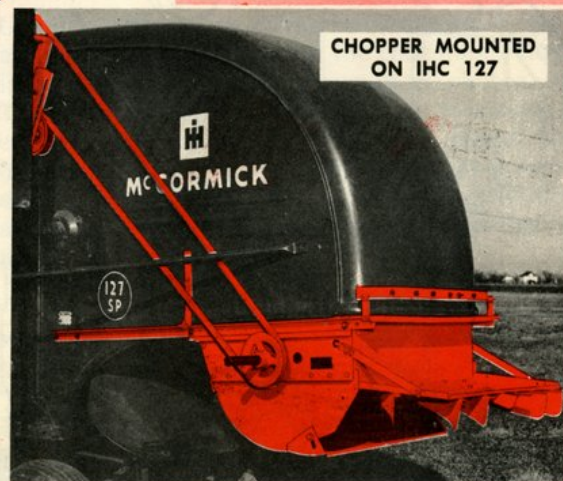

When concave teeth become worn, concave can be reversed by removing four bolts.

★ NO GREASING REQUIRED

Chopper rotor mounted on sealed ball bearings. Greased for life of bearing. No servicing required.

★ NON-CHOKING

Anything that will go through cylinder will go through chopper.

HESSTON MANUFACTURING CO., INC., — Hesston, Kansas

MORE FEATURES . . . that make the **HESSTON STRAW CHOPPER** the finest in the field!

★ **STRAW FINELY CHOPPED**

Straw is not just cut, but is broken and shredded. Straw plows under easily and will decay quicker.

★ **HEAVY-DUTY V-BELT DRIVE**

Jackshaft used so extra long belts not required. Heavy belts turn chopper with minimum stretch.

★ **MULTIPLE BELT ADJUSTMENT**

On all machines the jackshaft assembly and idler provides adequate adjustment to tighten belt stretch.

★ **CHAFFER NOT AFFECTED**

Chopper is mounted back far enough so chaff from chaffer is not retarded.

★ **LITTLE POWER REQUIRED**

Operation is approximately 2,600 rpm on perfect balance, the momentum of hammers chops straw with little power needed to keep up momentum.

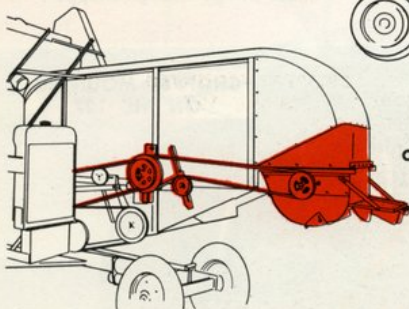

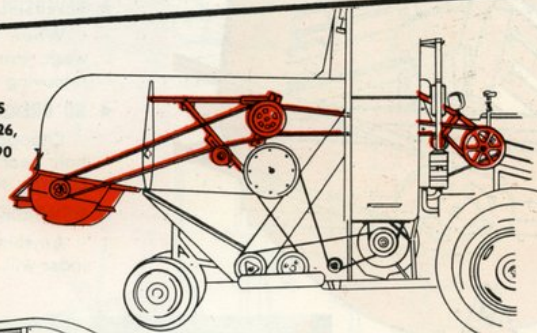

★ **STURDY LIGHTWEIGHT HOUSING**

Well-braced and mounted high under the hood, it will not interfere when crossing ditches. Compact and easy to handle.

★ **SIMPLE INSTALLATION**

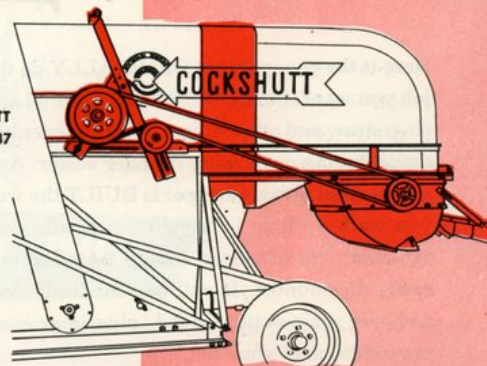

The adapter kit of mounting brackets and drive belts and pulleys is designed for efficiency and ease of installation. May be left on even if chopper is removed for straw baling, etc. Complete instructions furnished.

IMPROVEMENT PARTS AND
ATTACHMENTS for COMBINES

Read What a Few of Our Satisfied Customers Say—

Used in Soybeans, Rice and Lespedeza

"I think the straw chopper is a fine thing; it chops beans, rice, and lespedeza straw, and spreads it evenly on the ground. We are able to disk the ground and plant oats behind it, which we were unable to do before because of the straw being bunched."

M. O. BLACK,
Stuttgart, Arkansas.

Used in Wheat, Oats, Barley, and Flax

"I am well satisfied with the chopper, also the job that it does. I think it was money well invested."

PETE BARTSCH,
La Glace, Alberta, Canada.

Used in Clover and Barley

"Our opinion of the straw chopper is that it is without doubt the best chopper on the market."

ROBEN BROTHERS,
Rolla, British Columbia, Canada.

Used in Rye, Flax, and Wheat

"Anything you can get through the cylinder will go through the chopper without choking."

LAWRENCE UNRUH,
Surrey, North Dakota.

Used in Soybeans

"Wouldn't take \$500 for it, if I could not get another."

MARCELLUS BRYAN,
R. R. No. 3, Taylorville, Illinois.

OTHER HESSTON COMBINE ATTACHMENTS

Retractable Finger Augers, Straw Spreaders, Concave and Cylinder Adjustments, Cylinder V-Bars, Soybean Attachments, Maize Attachments, Unloading Augers, Tank Loader and Extension Units, Sealed Bearings.
